Optimizing the handling of your chemical inventory, a competent system that meets all demands for flexibility, performance, and scalability is needed. ChemicalInventory meet all demands for a controlling your inventory, and is simple to use with the intuitive user interface.

The system is currently in use on a daily basis to control thousands of compounds and containers in several independent installations, and is for the first time offered as a 'Hosted Service'. This service gives you unlimited system access, without the cost for purchase, setup and maintenance of servers, and all this at a very affordable monthly fee.

Standard price for a hosted solution is 345 \$/month. (Excl. sales tax)

With academic discount the price is only **170 \$**/month. (Excl. sales tax)

ChemicalInventory 'Hosted Service' gives you full overview of your inventory and includes email support and ensures optimal system performance, availability and stability
